POLISHER

[Call for Pricing](#)

CHARACTERISTICS:

- * Design and advanced technology combined with a customized, ergonomic and well-balanced format.
- * Reduced power, weight and dimensions: ideal for continuous machining, to minimize fatigue and maximize energy savings.
- * Designed for universal use: ideal to polish large flat surfaces and machine small shaped surfaces, vertical panels and parts that are difficult to access.
- * Usable with backing plates and shrouds up to 200mm.
- * Fitted with an extraordinary cooling system that extends the life of the tool, maximizing its resistance to overloads.
- * Double mechanical reduction gear to guarantee high torques even at minimum speeds.
- * Electric parts insulated with special resins that protect and extend the life of the tool.
- * Electronic module with speed adjustment and overload control.
- * Start-up with gradual acceleration for a consistent distribution of the abrasive paste.
- * Safety switch.
- * Ergonomic handle with adjustable protection for right and left-hand use.

TECHNICAL:

Power : 1100watt
Rpm : 750-1850rpm
Weight : 2kg
Max. disc diameter : 200mm
