HURRICANE MIG WELDING MACHINE

[Call for Pricing](#)

Hurricane MIG MAG gas shielded series welders can perfectly weld a variety of metals including carbon steel, alloy steel, aluminium and copper alloy, etc. Different alloy wires can be used according to the various alloy materials being welded.

Hurricane MIG/MAG2210 Welder Specifications:-

Input Voltage : 220V 50Hz

Input Power : 5.7KVA

No Load Voltage : 16 - 34V

Electric Welding Current Range : 35 - 210A

Duty Cycle : 25%

Wire Spool Diameter : 15KG 300mm

Flux Core Wire : 0.8 - 1mm

Wire for Steel : 0.8 - 1mm

Wire for Stainless Steel : 0.8mm

Wire for Aluminium : 0.8mm

Insulation Class : F

Protection Degree : IP21S

Dimensions : 920 x 390 x 640mm

Weight : 71kg

Features:-

- * Perfect for thin and medium thickness sheet metal welding.
- * Spot weld two overlapped metal sheets from one side.
- * Adjusting soft start provides a smooth arc start.
- * Simple and economic wire feeder with motor.
- * Automatic voltage compensation provides stable current.
- * High productivity, good quality, no spatter, or spray arc and good visibility while welding.
- * Small heated area from welding, ensures small transformation and perfect welding shape.
- * Overload protection and overheating protection.
