Spotwelder 6000Amp

[Call for Pricing](#)

The GP6000 Spotwelder is a 6000amp spotwelder and forms part of our newest range this high quality industrial spotwelder is finally affordable to all workshops and panelshops, microprocessor control optimises the output parameters and the durable and reliable touch panel allows quick settings.

The Hurricane GP6000 Spot Welder is equipped with Microprocessor digital control technology, with complete digital IC.

The simple and convenient design combined with the synergetic control panel ensures the optimum welder function. The moveable power supply and finished pneumatic spot gun, enables users to change operation as required. With optional different types of spot tools, various functions can be realised.

General Information:-

- * Digital adjustable: electric time, welding current etc.
- * Touch panel, durable and reliable.
- * Stable output current.
- * Microprocessor control to optimise welding parameters.
- * Can be connected to studder kit, manual spot gun and pneumatic spot gun.
- * Continuous single spot welding and pulse single spot welding.
- * Controlled by main voltage, all spots are distributed evenly.

Technical Data:-

Input Voltage : 380V 50Hz
Input Power : 11.5KVA
Delayed Fuse Current : 32A
No-Load Voltage : 11V
Dimensions : 550 x 280 x 350mm
Electric Welding Current Range : 200 - 4000A
Single Spot Welding Range : 0.8 + 0.8mm
Cable Length : 1500 + 2000mm
Electric Welding Current Range : 2000 - 12000A
Allowed Welding Thickness : 2.5 + 2.5mm
Extended Arm Welding Thickness : 1.0 + 1.0mm
Cable Length : 1600mm

Air Pressure : ≥ 6 MPa
