## **Infrared Paint Dryer GP-333)**

[Call for Pricing](#)

GP-333 short-wave infrared paint dryer is a tri tube unit which is capable of 3000W output. The core component of this infrared paint dryer is a highly intensive short-wave infrared heating tube. Painted surfaces can be dried in as little as 15~30 minutes.

GP-333 short-wave infrared paint dryer also has timing, temperature regulation, temperature setting functions and tubes can be activated individually depending on the surface to be dried.

Technical Data	
Description	Data
Working Current	17A
Power Consumption	3 x 1000W
Working Temperature	60 - 70Å° Celcius
Heating Area	800 x 1000mm
Working Voltage	200-240V 50/60Hz
Lamp Head Minimum Height	250mm
Lamp Head Maximum Height	2200mm
