DENT PRO PORTABLE DENT PULLER

[Call for Pricing](#)

The DENT PRO - PORTABEL DENT PULLER is a rugged locally manufactured and designed dent pulling unit which allows for significant time and cost savings when repairing small to medium sized dents.

- * The Dent Pro is a machine that has proven itself in the field over a number of years. Continuous development, and a countywide maintenance and service network have ensured the long-term success of the product.
- * The low cost of this machine can be recouped within a very short period as the time and cost savings are tremendous.
- * The Dent Pro can remove small to medium damage from panels without the need to strip interior trim, remove battery terminals or replace entire body panels.
- * The copper shrinking device allows for a smooth finish that is ready for painting.
- * It's rugged design and extremely simple operation is ideally suited to local conditions and operating requirements.

The DENT PRO Dent Puller has been endorsed by:

SAMBRA (2003/2004)
VW SA (Since 2001)
Delta Motor Corporation (200)
Daimler Chrysler (2001)
