INFRARED PAINT DRYER

[Call for Pricing](#)

The Hurricane

Infrared Paint Dryers are designed according to the most advanced automotive standards, our highly intense short-wave heating tube is set to revolutionise the painting industry. The Hurricane KQJ-113 short-wave Infrared Paint Dryer is a tri-tube unit which is capable of 1000W output per tube. The core component of this infrared paint dryer is a highly intensive short-wave infrared heating tube.

Painted surfaces can be dried in as little as 15 - 30 minutes.

Characteristics of the short-wave infrared paint dryers include:-

- * A high penetration ratio by heating the paint internally as well as externally.
- * Rapid thermal transfer.
- * Energy conservation.
- * Long Service Life.
- * The Hurricane KQJ-113 short-wave infrared paint dryer also has timing, temperature regulation and temperature settings function.
- * Input Voltage: 220V
- * Maximum Output: 3000Watt
